# WHO ARE WE

Universal Production, a prominent presence in the Qatari market since 2013, boasts over a decade of invaluable experience in the events industry. With an impressive track record of contributing to the grandest regional occasions, our seasoned team has consistently demonstrated its prowess.

For the past twenty years, UP has seamlessly blended local expertise with global perspectives, serving dual purposes as a technical powerhouse and a resourceful collaborator. Whether engaging directly with clients or partnering internationally with industry leaders, UP assumes the role of a dynamic frontrunner, steering and managing events with finesse.

At UP, we take pride in offering an all-encompassing solution for event management, media production, and guest coordination. As a comprehensive entity, we specialize in delivering end-to-end services that span the entire spectrum — from the initial conceptualization phase to the flawlessly executed finale. Whether catering to individuals or enterprises, our unified approach and adaptable strategies set us apart.

In essence, Universal Production emerges as the definitive answer to your event management and media production requisites. With an unwavering commitment to excellence, we stand ready to turn your visions into realities.

# Drones

Looking to empower your business with stunning aerial drone photography and videography? We provide best-in-class drone (UAV unmanned aerial Vehicles) services also known as the “eye in the sky”. Universal Production [UP] handles the whole process: from flight, to data processing, to data analysis. We help you leverage a drone's eye view by capturing and delivering gorgeous aerial photos and videos and generating the traction your project deserves. Our drone services are tailored to fit every client's needs. Our pilots are professional, well trained and experienced.

Because it is difficult to get an idea of the project by walking the grounds or looking at a map, we fly our drone over the property to give you a better sense of what the project looks like in pre and post-production. You'll get an aerial view of the space with an in-depth look at where everything is. In a bird's eye view, we capture the whole experience in an attention-grabbing way that your audience and clients will adore, providing amazing high quality visuals at significantly low cost.

# Photography & Videography

Our team of specialist video editors have the knowledge and skills to see your event through from start to finish, offering you results that are far beyond your expectations. Universal Production [UP] offers outstanding professional quality videos where each video is bespoke, beautiful and edited to your taste and style. We build a story around your video and add copyright free music, colour grading and special effects. We remove noise and in the post production stage, we add additional sound and music in the background to create a soothing effect.

When it comes to editing videos for Corporate Events, we can do great things with all types of footage. We choose a high quality editing service to guarantee we bring your video to life. With years of experience and a passion for creating perfectly edited videos, we're committed to excellence. We make the process simple and cost-effective, so we can deliver creative, attractive and spectacular visuals. At Universal Production [UP], we make sure your footage is edited to perfection, delivering superior quality videos and a fantastic finished product.

# Live Time Lapse Cameras

Time-lapse photography is a technique that Universal Production [UP] uses to capture great imagery to create an amazing time lapse film (small film), and to produce breath-taking results with emotional impact.

We aim towards getting top results even under the most difficult situations of light and environment. To this end, we use excellent cameras with brilliant sensors. Our system design ensures maximum stability and durability regardless of climate conditions and weather. We make sure we have high-resolution photos taken at regular intervals. To showcase your project progress in the best possible way, we handpick the best and most interesting pictures and sequences and we use the component of time very consciously. With our images we are well equipped for future developments, and with our state-of-the-art post production infrastructure, we make the documentation of your event future-proof.

# Live Feed

Live stream the event as it's going on! Live streaming on social media platforms is becoming more popular among businesses, as it helps firms and organizations connect with their audience on a deeper level despite the barrier of physical location. As a broadcasting practice, we bring audio and video of real-time happenings to viewers over the internet. We can also broadcast your event live on social media platforms, inside the side on LED screens or between two sites. Ensuring that your stream works perfectly and functions consistently without any technical glitches, allowing viewers to access your live stream anytime, anywhere especially on their smart phones

With Universal Production [UP] you can host your live stream event with little to no technical know-how, as we offer high-quality streaming, video analytics, video monetization, privacy and security. In this way, you can reach a wider audience in real-time and interact with more people across the world. We make your in-person events available for remote attendance.
